#### Annexture-1

#### 2016-17

Title: Counselling the employers to cut the dropout rate- a unique practice adopted by the evening college.

**The objectives:** Through this practice adopted by the institution since its inception teachers have been persuading the employers to help their employees attend classes to enable the employed students pursue education which is the mission of the college.

**The Context:-** Many evening college students cannot attend classes regularly due to untimely shifts, work pressure or unfriendly attitude of the employers. They are not given permission to write the exams which are conducted in daytime. In such a situation, teachers have been meeting the employers, speaking to them about the students' problems, counseling the employers to change their attitude and finally permit those employed by them to attend classes and write exams.

The practice:- When students approach the teacher about their problems in their work place and make it clear that they are not able to speak and convince their employers, teachers take the phone numbers and other details of these unwilling employers, speak to them in a persuasive way and see to it that the students are given the maximum advantage to continue their studies.

#### Obstacles faced if any and strategies adopted to overcome them

The main obstacle in this practice is meeting or convincing the reluctant employer. Many times the employers are rude and discourteous and unwilling to listen to the teachers, sometimes they even assume that students themselves have sent their teachers to ask for favours. But right kind of approach can solve these misunderstandings and 99% of the employers are willing to encourage their employees pursue their studies.

**Impact of the practice:-** Once the students come to know the teachers are willing to counsel and talk to their employers they bring in their friends who are facing the same problem with their employers and over the years this practice has helped all our working students pursue their studies without much harassment from their employers

**Resources Required, if any:-.**No resource is required for this practice except the willingness on the part of the teachers to solve the problems of the students.

杂杂杂杂

#### 2016-17

Title: In house placement- Students as placement agencies-an evening college scenario:

**The objectives:** 1) Students want their classmates and friends to find better jobs 2) They would have known their friends' abilities and needs and would willingly want to help them get jobs.

The context:-Many of the students in our evening college are employed in MNCs, IT companies or run their own companies or organizations and when vacancies arise in these places of work, they prefer their own classmates and recommend them to their employer and thus see that their classmates are placed in reasonably good jobs. There are many students who are themselves entrepreneurs and have employed their own classmates in their own companies.

**The practice:** Many times such in house (class) placements happen even without the knowledge of teachers. This practice has been in vogue since the very beginning of the evening college and records cannot be maintained about such placements.

#### Obstacles faced if any and strategies adopted to overcome them:-

1. Students should have built a very good and cordial relation with each other and only then such placements can happen. Such relations are usually there in a class and teachers should see to it that such good relations are not hampered.

**Impact of the practice:-**Students need not depend on placement agencies that come to the college but without facing the ordeal of an interview (interviews are ordeals for rural students with no good soft skills) can get jobs.

**Resources Required if any:-** Except good and cordial relations and intention to help their classmates in the job search, no other resources are required for this healthy practice.

#### Annexture-2

1. Provide an analysis of the feedback in the Annexure

Feedback is obtained in the following ways:-

- a) In each and every class, every minute feedback is got about the teachers method of teaching
- b) Feedback is formally obtained in prescribed forms.
- c) Students directly speak to the teachers, Principal and the management and give their feedback on teaching-learning activity.
- d) Teachers also submit self-assessed confidential reports which are discussed in the Governing Council meeting and action taken.
- e) Feedback is also obtained from the Alumni association and the employers and parents as well.
  - Conscientious teachers use the feedback obtained in the class and immediately react positively. The principal and the management use the student feedback to bring in changes in the teaching learning activity. The student feedback about the curriculum can be conveyed to the university through the BOE and BOS members and required changes can be brought in the curriculum in the coming years. Since our students work in many of our own sister institutions and in offices and malls in and around the college, getting feedback from the employers is not very difficult. This feedback about the syllabus, teaching learning activity, co-curricular activities etc., are conveyed to the management and the right kind of action is taken accordingly.
